

The following table contains the requirements for the Semester Project—your site that you upload through cPanel to your subdomain at www.mrleo.net. For the features that are required on at least one page (such as an unordered list, for example), please indicate the name of the page (or one of the pages) on your site that includes that feature. Design features may be fulfilled over the course of the semester, while functionality will be assessed at the end of the semester.

Design Features

Completed	Description	Page that exhibits the required feature
	Your site uses at least one external stylesheet.	
	At least one page uses a background image that is tiled.	
	At least one page uses a background image that fills the page (without repeating).	
	At least one page has an external link that opens in a new tab.	
	At least one page uses an image as an anchor for a link.	
	At least one page includes at least one unordered list.	
	At least one page includes at least one ordered list.	
	At least one page contains at least one table.	
	At least one page uses Google fonts (or equivalent).	
	At least one page uses a media query.	
	At least one page uses flexbox.	
	At least one page uses CSS grid.	

Functionality

Requirement Satisfied	Feature
	Your homepage is titled index.html.
	Each page has an appropriate page title.
	A favicon appears on each page.
	Each page links to the home page, at a minimum. (Consult the instructor if you would prefer to set up a different format of navigation—sequential, e.g.)
	All links function correctly.
	All images load correctly.
	Your site contains at least 9 pages.
